

## **Elementary Hybrid Learning Take Home Meal options**

Effective Tuesday Jan 25<sup>th</sup> during Hybrid in-person learning, Sodexo will be offering take home meals for both breakfast and Lunch for alternating remote learning days. Children may choose to participate in either the take home meal program or the remote meal pick-up program for days that they are not in person.

Each day, we would like to provide the elementary students with the opportunity to preorder a take home shelf stable (non-refrigerated) meal with their daily lunch selection. The menu is limited due to the need to provide non-refrigerated products that meet the USDA meal requirements. Students are not required to take home a meal and may choose to participate in the remote meal to go program which continues to be offered daily at the East Hartford High School.

\*When students order their meal in the classroom each morning, they can select “**Yes**” or **check** the box in the column “**take home meal**” to preorder and receive a take home meal (breakfast and lunch) that will be provided to them before they leave each day to take home with them.

We are hoping that this will help support the families and students on those days their students are not learning in person.
