Getting Started with your Elmira Student Device

1. Plug it in and Power it on

Connect your power adapter to a wall outlet and the plug on the left side of your device.

Power it on by pressing and holding the power button on the right side of the device until you see the Dell logo.

Power Volume

2. Connect it to your wi-fi network

Once it boots up to the Windows 10 login screen, press the Enter key and Enter again to accept the Legal Notice. Click the No Wi-Fi icon in the lower right and select your wireless network. Click Connect, enter your network security key, if needed, then click Next.
When it says you are connected and secured and the fan shaped wi-fi network icon is showing, then you are connected to wi-fi and you can now login.

3. Login with your student username and password

Wait about 30 seconds after you connect to wi-fi to enter your username and password on the login screen.

User name is in the format: lastname-firstname*
Password is the seven digit student ID

*see the letter from the district to be sure, there are some exceptions

Click the arrow button next to password to login

If you get an error that begins: "We can't sign you in with this credential because your domain isn't available" This means you are not connected to the Internet. Make sure you are connected to wi-fi and try again. Make sure Airplane mode is not turned on.
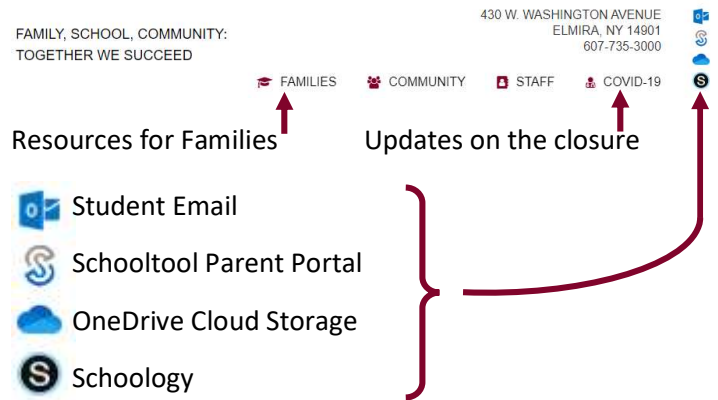

Acceptable Use Agreement

If your student has not logged on before, the Acceptable Use Agreement may appear on the screen. Click *I agree to abide by this policy* on each window to proceed to the desktop.
