

Helping Hands

Ridgewood

Hello!

We are a **club at Ridgewood High School that volunteer by tutoring elementary school students for free**. If a student is struggling in class or needs help with homework, we are here to help! Last year, we focused solely on tutoring for math, but this year, we are branching out to English as well.

Where?

Tutor sessions will occur **online to ensure flexibility** with time, both for the student and the tutor.

One on One

Although we did mostly office hours tutoring last year, we will be switching to **one on one tutoring starting this October**.

Math

We'll be continuing our **math sessions** similar to last year, with tutors helping students with difficult problems and likely also providing extra problems to practice.

English

We recently added the English section of Helping Hands! We'll be assisting your students with **both reading and writing**, offering help such as reading comprehension practice questions or extra grammar practice.
